Scale: 1:3000

December 2018 – Pensford Air Quality Update

Results

Summary table displays the 2017 data and provisional 2018 data for the months January – October

- All values are averages and 2017 values are 'annual averages'
- Any exceedances of the NO₂ annual mean objective of 40 µg/m³ are shown in bold.
- The results for 2018 are indicative only.
- DT174 was a new location for 2018, and the monitor appears to be capturing a worse case.

Site	2017 data (µg/m ³)	Provisional data for Jan-Oct 2018 (µg/m ³)
DT119 – Pensford 1	16	-
DT125 – Pensford 2	33	-
DT174 – Pensford 3	-	38
